EDUCATION

B.E. (HONS) IN COMPUTER SCIENCE & ENGINEERING

Myanmar Institute of Information Technology (MIIT) / 2022 – 2027

Status: Final Year (Exp. 2027)
CGPA: 3.28 / 4.00

SKILLS

LANGUAGES
C#, Java, Dart, JavaScript (ES6+), TypeScript, Python, SQL, C/C++

BACKEND & APIS
ASP.NET Core (.NET 10), EF Core, Node.js, Express, Flask, REST APIs

DATABASES
PostgreSQL, MongoDB, SQLite, Cloud Firestore, Schema Design

MOBILE & WEB
Flutter, React, Next.js, HTML5/CSS3, Tailwind CSS, Provider

TESTING & SECURITY
xUnit (152 tests), JWT, Token Rotation, Identity, bcrypt

DESIGN & TOOLS
Figma, Design Systems, Prototyping, Wireframing, Git/GitHub

CREDENTIALS

KBZPay Student Ambassador
Batch 17 / June – August 2026
Fintech onboarding & student UX feedback.

Data Engineering Level-1
Realistic Infotech Group / July 2026
Database schemas, pipelines & SQL tuning.

Next Gen Digital Mastery
Jefferson Center / July 2026

ASEAN Data Science Explorers
SAP Analytics Cloud / 2026

LANGUAGES

Burmese	Native
English	Professional
Japanese	Conversational (N3)

SUMMARY

Final-year Computer Science & Engineering student at MIIT (graduating 2027) with deep project experience building scalable **C# / .NET modular monoliths**, distributed REST APIs, and offline-first mobile applications. Combines disciplined software architecture, strict security authorization boundaries, and automated test coverage with high-fidelity UI/UX design systems in Figma.

SELECTED WORK & ARCHITECTURE

MATCHGUARD — VERIFIED MARKETPLACE PLATFORM

2026

Backend Architecture & Full-Stack • `C# 13, .NET 10, ASP.NET Core, EF Core, PostgreSQL, Next.js, xUnit`

- **Modular Monolith Architecture:** Engineered a non-custodial marketplace backend with ASP.NET Core Identity, JWT authentication, and rotating refresh token cookies.
- **Server-Enforced Order State Machine:** Implemented strict order lifecycle transitions (`Placed → Shipped → Completed`) with buyer-only delivery verification and transaction-linked reviews.
- **Rigor & Test Suite:** Developed 152 automated tests (84 Unit, 68 Integration) validating security policies SEC-01 through SEC-13, private NRC document storage, and audit logs.

BAGANETIC — FULL-STACK CULTURAL TRAVEL PLATFORM

2025 – 2026

Full-Stack Development & UI/UX • *Awarded Grade A (Cohort Highest)* • `Node.js, Express, Python/Flask, MongoDB, React, JWT`

- **A* Pathfinding & GIS:** Built an interactive pagoda navigation engine and Flask microservice running A* shortest-path routing over real Bagan road network datasets.
- **Production REST APIs & Admin:** Built REST APIs with JWT authentication, MongoDB indexing, defensive rate limiting, and an admin dashboard with CRUD and audit trails.

BAGANETIC MOBILE — OFFLINE-FIRST TRAVEL COMPANION

2026

Flutter Mobile Developer • *Team Special Award at University Project Show* • `Flutter, Firebase, Firestore, SQLite, Provider`

- **Offline Synchronization:** Combined Firebase Cloud Firestore with local SQLite caching and cached OpenStreetMap tiles for zero-connectivity navigation.
- **Product Experience:** Built bilingual (English/Myanmar) localization, community road hazard reports, and trip planning with reactive Provider state management.

MEMOORA — AI DREAM ANALYTICS PRODUCT DESIGN

2026

UI/UX Co-Lead • *Joint 2nd Place in 1–Month Product Hackathon* • `Figma, Design Systems, Mobile UI/UX, Prototyping`

- **Comprehensive Design System:** Co-designed 50+ mobile UI/UX screens with design tokens, typography scales, interactive prototypes, user flows, and developer handoff documentation.

ADDITIONAL SYSTEMS & DATA WORK

2025 – 2026

- **GeoAlert AI (2026):** Geospatial risk analytics engine processing regional hazard records with Pandas to render dynamic 3D heatmaps and vulnerability profiles in PyDeck.
- **Retail POS (2025):** Role-based point-of-sale system in Django & SQLite with inventory management, cashier checkout, printable receipts, and automated tests.
