Computer Science and Engineering student building practical web and Flutter applications from product design through backend APIs, databases, and polished user flows. Interested in software engineering, full-stack, mobile, and UI/UX roles.

TECHNICAL STRENGTHS

Web & backend: JavaScript, Python, React, Node.js, Express, Flask, REST APIs, MongoDB/Mongoose, JWT authentication, input validation

Mobile & data: Flutter/Dart, Firebase Authentication, Firestore, SQLite/Sqflite, Provider, offline caching, OpenStreetMap, A* route planning

Product & tools: Figma, wireframes, design systems, responsive UI, Git/GitHub, Streamlit, Pandas, PyDeck

SELECTED PROJECTS

Baganetic - Full-Stack Travel Platform | Node.js, Express, Python/Flask, MongoDB, React
Built authentication, REST APIs, interactive maps, A* route planning, favorites, an AI travel assistant, and an admin dashboard with CRUD workflows and activity logs. Awarded Grade A, the highest grade in the cohort.

Baganetic Mobile - Flutter Travel Companion | Flutter, Firebase, Firestore, SQLite, Provider
Developed guest/email authentication, trip planning, road-safety reports, English/Myanmar localization, offline tile caching, and offline routing for limited-connectivity use. Received a Special Award as a team at the project show.

Memoora - Hackathon Product Design | Figma, Design System, Prototyping
Co-designed a dream-journaling product with a four-person team; produced 50+ UI/UX screens, reusable components, user flows, and developer handoff materials. Awarded Joint 2nd Place.

Retail POS - Django Application | Django, SQLite, HTML/CSS
Created a role-based point-of-sale system with product and stock management, cash/card checkout, printable receipts, daily sales reporting, and transaction-safe checkout tests.

RECOGNITION & TRAINING

KBZPay Student Ambassador, Batch 17 - selected to represent KBZPay on campus; completed sessions on product usage, financial literacy, communication, and personal branding.

Training: Data Engineering Level-1 Scholarship, Realistic Infotech Group (completed July 2026); ASEAN Data Science Explorers 2026 Enablement Session - SAP Analytics Cloud.

EDUCATION & LANGUAGES

B.E. Computer Science and Engineering - Myanmar Institute of Information Technology (MIIT)
4th Year, 2nd Semester | Expected graduation: 2027 | CGPA: 3.28

Languages: Burmese (native), English (professional working proficiency), Japanese (conversational speaking, JLPT N3)
